The Global Plastic Treaty: Asia Pacific Perspectives

Dear Friends,

INC 2 is happening next week in Paris, France and this is an opportunity for us in Asia Pacific to push forward our demands and set the standard for a strong plastics treaty suited to our region. As such, from May 29 - June 2 we invite our members to put a spotlight on the Asia Pacific perspective this INC-2.

We hope you would support our efforts by sharing the quote cards on your social media handles far and wide using the hashtags: #PlasticsTreaty #INC2 #GlobalPlasticsTreaty #WeAreGlobalSouth #BeatPlasticPollution #PlasticCrisis

The BEST (and quickest!) way you can help is to reshare our Facebook post and/or tweet:

All The Asia Pacific region had just experienced a record-breaking heat wave in early May 2023, with temperatures ranging from 40-45oC in many places. Many causes lead to climate change, but I find one serious concern is emissions associated with the life cycle of plastics, especially from accidental or intentional burning of plastics, including waste-to-energy (WtE) projects. There is a lot at stake for the Asia Pacific region, and so in the name of addressing the plastic pollution problem, we must not be co-opted into accepting false solutions such as advanced recycling and chemical recycling technologies or even this entire push towards biodegradable plastics in the name of alternatives. In addition, the Asian region must recognise the inherent conflict of interest that will arise out of the presence of fossil fuels and petrochemical companies and must push for them to be kept out of the discussions, as this could undermine the discussions.
